

Introducing I-DNA: Where Planning Begins

*Race to the Top (RTT) and the Common Core Learning Standards have challenged school districts to rethink their curriculum, assessments and instruction. CORE puts the **Learner First** while bridging the gap between expectations and performance.*

I-DNA

Where Planning Begins

Your Challenge:

How can you best prepare your students for success and promote **College and Career Readiness**? How can you communicate clear expectations and track student progress without duplicating work in multiple systems?

The CORE Approach:

Achievement in school takes more than high expectations and hard work. It takes planning on all sides, from administrators and teachers to parents and students. **I-DNA** is a comprehensive set of tools that help all stakeholders understand what it takes to succeed and offers tangible steps to help students raise their own bar for performance.

Features Include:

- A **Curriculum Mapping** tool and a lesson designer that connects lessons to learning
- A built-in **Rubric Designer** that offers students and parents a clear understanding of teacher expectations
- Assignments, lessons and assessments that are automatically linked to **Gradebook**
- Complete **Assessment Designer** for paper, mobile or online testing
- **GradeCam**, a cutting-edge software tool that enables teachers to grade paper assessments with any webcam or document camera in seconds
- The ability to **share lessons**, assessments and rubrics with colleagues in your school, district or globally
- Tracking of instructional inputs such as content difficulty, learning styles, interest areas, and classroom environment to give an **in-depth profile of teacher instruction and student learning**
- **Email notifications** to increase parent involvement
- Aligning of lessons and assessments to **Common Core** and **State Learning Standards**

CORE is an innovative, all-in-one online data management system that provides administrators and teachers real-time data to drive instruction. CORE generates unique learning profiles that track student mastery of Learning Standards and highlights students' individual learning styles as well as the effectiveness of teachers' instructional practices.

With CORE, the Race just got easier.
