

Introducing S-DNA: Where Learning Begins

*Race to the Top (RTT) raises the bar on student achievement to increase **college and career readiness**. CORE puts the **Learner First** while bridging the gap between expectations and performance.*

S-DNA

Where Learning Begins

Your Challenge:

Today's RTT environment has made student performance measurement an increasingly critical aspect of teachers' and administrators' responsibilities. How can you prevent these mandates from taking up too much of your time and energy?

The CORE Approach:

With easy-to-use functionality and 24/7 accessibility, S-DNA measures and automates every facet of student performance, enabling teachers to have more time to do what they do best: Teach.

Features Include:

- A **Student Information System** with student demographics and attendance tracking
- An **Online Learning Portal** that allows for blended learning and enhances interaction among teachers and students
- A **Grade Tracking** system that uses heat mapping to visualize student performance and employs rubrics to make essay grading easier
- **GradeCam**, a cutting-edge software tool that enables teachers to grade paper assessments with any webcam or document camera in seconds
- A **Behavior Tracker** that categorizes and keeps tabs on positive and negative behaviors, ranks type and severity of behavior and the effectiveness of interventions used
- Communication tools such as **messaging, meeting scheduler** and **assignment of tasks** as well as **automatic email notifications**
- An integrated **Calendar** to help students, teachers and parents stay up to date

CORE is an innovative, all-in-one online data management system that provides administrators and teachers real-time data to drive instruction. CORE generates unique learning profiles that track student mastery of Learning Standards and highlights students' individual learning styles as well as the effectiveness of teachers' instructional practices.

With CORE, the Race just got easier.
