

Introducing T-DNA: Where Teaching Begins

*Race to the Top (RTT) demands that schools use data like never before to track student performance and teacher effectiveness. CORE puts the **Learner First** while bridging the gap between expectations and performance.*

T-DNA

Where Teaching Begins

Your Challenge:

Given the new RTT mandates, how can school administrators get a better handle on teacher performance, track SLO & APPR data, and still have time to be effective instructional leaders?

The CORE Approach:

T-DNA offers administrators quick access to critical information all in one system. **The Teacher Evaluation, APPR and SLO Trackers** in CORE are your solution to monitoring staff performance data in real time and will help you make more effective decisions.

Features Include:

- A simple **SLO creator** that automatically generates HEDI score
- Building and professional **profile reports**
- **SLOs that vertically align** district, building, department and individual objectives along with grade, subject and standards
- Trackers that are designed to help you **meet APPR requirements**
- Reporting tools that **save time** and fulfill all of your state tracking and reporting needs
- The ability to **monitor and approve SLOs** for your entire district in an intuitive web portal

Teacher Evaluation

This feature allows you to input the data from ANY state approved rubric and track multiple evaluations to ensure district fidelity of APPR implementation.

CORE is an innovative, all-in-one online data management system that provides administrators and teachers real-time data to drive instruction. CORE generates unique learning profiles that track student mastery of Learning Standards and highlights students' individual learning styles as well as the effectiveness of teachers' instructional practices.

With CORE, the Race just got easier.
